

## HEPHS - ISIB DEPARTMENT

Nuclear techniques have been taught at ISIB since 1970. Inclusion of the medical field has been done since 1990. The multidisciplinary approach intends to increase the ability of insertion into the world of work.

### Training description

- Master in Nuclear and Physics engineering
- Duration: 2 years (after 3 years of bachelor in industrial sciences)
- Location: Rue Royale, 150, 1000 Bruxelles

### Objectives

Multidisciplinary studies related to nuclear and physics in engineering. Medical purposes achieved by means of lectures, practical works and possibilities of internship (related to radiology, radiotherapy and nuclear medicine) in hospitals.

### Target audience

Person with a bachelor degree in engineer sciences or equivalent

### Key figures

- Date of establishment: 1970
- Number of employees : ~40
- Number of people trained : ~10 in the two years of master
