

ULIEGE - UNIVERSITÉ DE LIÈGE

Established in 1817, the University of Liège (ULg) is a French-speaking, European university offering a comprehensive range of educational programs organized by 11 faculties/schools on 4 campuses. Bachelor's, master's and PhD programs are offered in all areas. The university is fully integrated in the Bologna Process and complies with the highest European standards on university education. It offers curricula that are well adapted to a changing world and the expectations of the modern job market to its 21,000 students - 23% of whom come from foreign countries.

Training description

University offering a wide range of educational opportunities and excellence in research. More than half the university budget is devoted to research, where excellence is a must. The University of Liège has a strong record of research and innovation in a variety of fields, including the life sciences, biotechnologies, earth sciences (environment and agronomy), engineering, and the humanities. Interdisciplinarity and internationalisation are keywords in the research units of the University's research policy. The ULg strives to provide its researchers with the best possible working environment and has been awarded the EU's "HR Excellence in Research" label. Providing strong education, research and professional training, the University of Liège is a driving force in the area's economy and has played a key role in launching spin-off companies in many fields.
